

We make machine
vision simple.
It's so easy!

iDS
#idshasvision

Our high product quality 'Made in Germany' is guaranteed by our exceptionally high in-house production depth. Regular investments in high-level specialised machinery and employees for production and quality assurance ensure this.

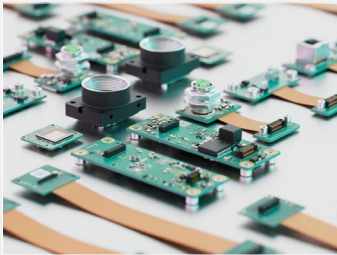

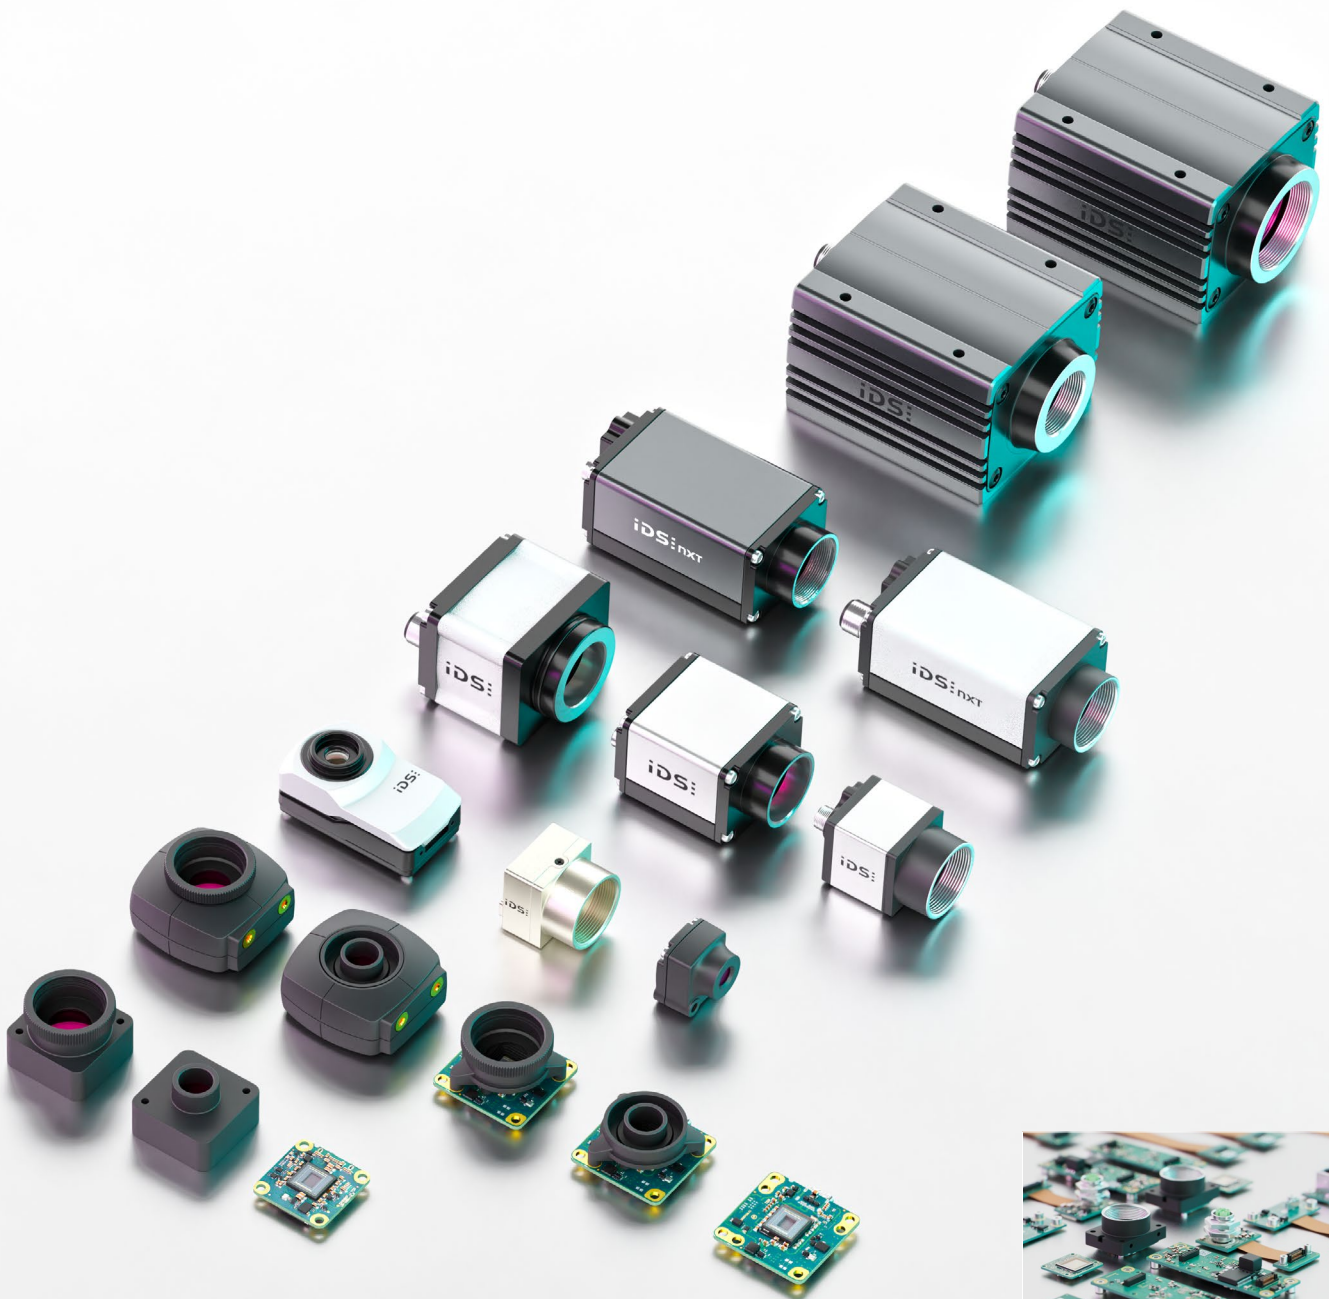

We are a leading manufacturer of industrial cameras and pioneer in industrial image processing. As an owner-managed family business we develop powerful and versatile 2D and 3D cameras and models with artificial intelligence (AI).

■ Made
■ in
■ Germany

We manufacture exclusively in Germany:
Our development and production site is located in Obersulm, Baden-Württemberg. We are represented internationally with subsidiaries in the **USA, Japan, South Korea and the UK** as well as further representative offices in **BENELUX, France and India.**

A total of three different product lines enable an almost unlimited range of applications in equipment, plant and mechanical engineering as well as in non-industrial areas.

Customised cameras
Unique requirements,
unique solutions.

Image analysis with AI

IDS NXT is the all-in-one vision system for the use of intelligent cameras and makes deep learning fast, easy and affordable.

You benefit from user-friendly workflows and perfectly coordinated hardware and software.

3D Cameras

Ensenso 3D cameras offer 3D image capture with the highest precision and speed for economical applications in industry 4.0, e.g. in robotics and automated series production or in logistics.

With a sense for the industrialisation of consumer technologies and a great willingness to change, Jürgen Hartmann has established IDS as a major player in the camera industry since its foundation in 1997.

Managing Director

As an environmentally certified company, we see it as our responsibility to keep our ecological footprint as small as possible and to protect our environment. This includes sustainability in production and shipping, fairness towards our business partners as well as family awareness and a good work-life balance. Our products help to conserve raw materials and optimise processes in almost all countries.

Our sustainable, ethical business practices actively protect the environment.

IDS at a glance

about **1.9 million cameras** “made in Germany” are in use worldwide

more than **11.000 customers** in over **75 countries** rely on IDS

IDS has about **5.000 products** in its portfolio

IDS has more than **25 years of experience** in image processing

family-owned with more than **350 employees** from 21 countries

Whether in equipment, plant and mechanical engineering, medical technology, agriculture or logistics - machine vision solutions are used in a wide range of industries and scenarios to accelerate, control and optimise processes.
